

***Additional Fees Which May Be Incurred During Your Examination***

A *refraction* (CPT 92015) is a vision test that determines whether you need glasses or whether your current glasses prescription needs to be changed. A refraction may be part of your eye examination today. This helps us determine your best possible vision. Most importantly, if your vision cannot be corrected with glasses, a refraction can determine whether an underlying eye disease is the cause of your decreased vision.

Some medical insurance plans (including Medicare and Anthem Blue Cross Blue Shield) do not cover refractions or routine eye examinations (when no medical eye problem is known or suspected) and they do not consider the refraction to be part of a medical eye exam.

If you are being seen for a routine eye examination (no known or suspected medical eye problem) and using your vision plan benefits, the refraction will be covered by the vision plan. There is no separate charge for the refraction in this circumstance. We participate with Davis Vision (also known as FEP Blue Vision), most EyeMed plans, and Vision Service Plan (VSP).

When a refraction is performed in conjunction with a medical eye exam, there is a \$35 fee. We will bill your health insurance company. Coverage is determined at the time a claim is received by your health plan. If your insurance denies the refraction, you will be responsible for the fee.

No Show Fee – If you cancel your appointment with less than 24 hours notice, you may be charged a now-show fee of up to \$50. We realize that there may be circumstances beyond your control where you will not be able to give 24 hours notice. However, if there is no documented attempt to cancel, you will be responsible for the fee.

If you have any questions, please speak to one of our financial secretaries.

I accept financial responsibility for these fees.
